Software Development Intern

Internship Description

Acutec Continuous Improvement seeks an intern with experience in software design, programming and debugging. The intern will gain exciting real-world software development experience at a thriving manufacturing company.

We frequently work as a team to solve problems, explore new technologies, and learn from one another. The ideal intern for this environment will be enthusiastic and collaborative.

Responsibilities:

- Develop, test, debug, and extend software systems
- Respond to and resolve user-submitted problems and questions
- Collaborate with multiple teams within the company
- Maintain version control and internal documentation

Qualifications/Skills:

- Understanding of programming and software development
- Track record of successful software development
- Ability to write clean, correct, well-documented code
- Excellent complex problem solving and critical thinking skills
- Working knowledge of SQL and Microsoft SQL Server
- Solid troubleshooting and communication skills

Education and Experience Requirements:

- Working towards bachelor's degree in computer science, engineering, or a related field
- Experience with software development in a team-based environment
- Experience programming in C#, or Java
- Familiarity with HTML, JavaScript, CSS
- Excellent analytical and mathematics skills
- Ability to work well in teams

Benefits

- Practical experience with a wide variety of software development tasks
- Collaborating hand-in-hand with a skilled software engineer
- Opportunity to participate in networking events and company meetings
- Flexible schedule for students
- Consideration for Full Time Position after successfully completing bachelor's degree
- Compensation available

Applicants to email a resume to bmccrillis@acutecprecision.com.
